Note, That Easter always falls between March 21. and
 April 26. exclusively; and if the Golden Number be either
 13 or 16, and the Dominical Letter G, then Easter-day
 falls on our Lady-day, or Mar. 25. (as in the Year 1722.)
 Likewise when the Golden Number is 8. and the Domini-
 cal Letter C, then Easter-day falls on St. Mark's day, or
 the 25th of April.

The Dominion of the Moon in Man's Body
 passing under the 12 Signs of the Zodiac
 V Head and Face.

The Characters of the Seven Planets.

♄ Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus, ☿ Mercury, ☾ Luna, ☊ Dragons-head, ☿ Dragons-tail.

On the Twelve Signs.

The Princely *Aries*, clad in his golden Wool,
 Looks back admiring to behold the *Bull*
 Against him rise, who with a chearful Face
 Calls to the *Twins*, to bid them mend their pace;
 The *Crab* these follows, and the *Lion* then;
 Next the *Celestial Maid*, (not known by man)
Libra comes after, who (lest time should fail)
 Weighs out the Days and Nights in equal Scale,
 And calls the *Scorpion* on, who in his Train
 Bears a bright fulgent Star, at which (in vain)
 The *Centaur* (with his string drawn to his Ear)
 Arms his keen Shaft; the *Goat* doth next appear,
 That's *Capricornus* call'd, who oft-times lowers,
 Because to quench his Star *Aquarius* powres.
 His Laver forth; next after him he plac'd
Pisces, which of the twelve Signs is the last. *Mundell*

A Description of the four Quarters of the Year; and first of Winter.

Sol in Capricorn, Aquarius, Pifces.

ACCORDING to the custom of Winter, in this first Winter-quarter is the first quarter, which hath beginning the 22nd of December, at which time the Sun enter'd into the first degree of this cold and dry Sign Capricorn, being the most remote from us, in his furthest South Declination, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath fully passed through Capricorn, Aquarius, and Pifces, and hath generally receiv'd the Old Age.

Of the Spring. Sol in Aries, Taurus, Gemini.

THIS quarter takes beginning near the 10th of March, at which time the Sun entereth into the first minute of Aries, making equal day and night; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter hath receiv'd the Growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

THIS Summer-quarter doth take his beginning when the Sun enters in to the first degree of Cancer, which will be this year on the 11 of June; and continues whilst the Sun passeth through Cancer, Leo, Virgo. Now the days are longest, and the nights shortest; therefore this quarter hath receiv'd the Full Age.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

AUTUMN, or the third quarter (commonly called the Fall of the Leaf of some the third Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length; which will be this year the 23rd of September, and continues whilst the Sun passes through Libra, Scorpio, and Sagittarius. This quarter doth fully receive the Declining Age, and Phlegmatic Complexion.
